ARTISANS’ QUARTER – AREA 2
Date of observations: June 2012

This report has three elements.

1. A brief overview account of the trees in the area.
2. An area map showing:
   - the location of TPO trees,
   - trees shown on Unwin’s 1913 map and,
   - other trees which make a significant contribution to the local streetscape.
3. A spreadsheet providing full details of the observations.
Area 2 Overview

Date of Observations October 2012 – May 2013

Introduction

The Artisans’ Quarter is the oldest part of Hampstead Garden Suburb. It is an area in which the oak trees originating in the pre-existing field hedges are an important feature of the landscape. These boundary oaks and other significant trees are mainly found in the generous backland allotments and recreational areas. Much of the picturesque character of the area derives from the juxtaposition of the huge old trees soaring above the steeply pitched roofs of the cottage groups. There is also some specimen planting in public areas and many mature trees in rear gardens.

Street trees are not part of this Survey, but it is worth noting how many streets are lined with large trees (e.g. lime, London plane) rather than smaller ornamental trees. This adds further depth to the contribution that trees make to the lush green ambience of this village-like area.

However, as elsewhere in the Suburb, there is a lot of overcrowding from self-seeded trees. This reduces the impact that mature trees can make in the landscape. Some species are so rapid in their growth that they are unsuitable for front gardens, masking the architecture, blocking light and potentially, if too near the house, causing damage.

Species in Area 2

Oak (56) is the most numerous species followed by acer (including field and Norway maple, sycamore and Cappadocian acer), lime and birch. Outside these concentrations, the individual trees are from a range of species which are commonly found in Southeast England: ash, horse-chestnut, beech and copper beech, box elder, willow and yew.

TPO Trees in Area 2

28 TPO trees are shown on Barnet’s map of this section of the conservation area. With the addition of a TPO made in March 2014 on an oak at 12 Asmuns Hill, this figure is now 29.

Most of these can easily be seen from the road or public footpaths although the group of TPOs in Denman Drive can only be seen over the rooftops from the road.

15 of the 29 TPO trees are mature oaks. 8 are trees of exceptional quality, in good condition and having great height and good shape. These are noted in the spreadsheet. The oak in the corner of Big Allotment that can be seen down the twittens leading from both Wordsworth and Coleridge Walks is quite exceptional in its age, condition and beauty. It is certainly one of the two or three finest trees in the whole Suburb. The remainder of the TPO trees flourish but have sometimes been subject to the removal of branches without regard to the overall shape of the tree.

There are 4 TPO queries in this area. 4 TPO trees were found to be of a different species from that shown on the Barnet map and listing.

In Denman Drive where it is difficult to view the trees at close quarters, the TRE-F1-43 group did not appear to correspond to the listing:

- T5 is an oak, not an ash, and it is in the rear boundary of 7 Denman Drive rather than in the rear garden of 12 Woodside as shown on Barnet map
- T6 is an oak not an ash
- T8 appears to be an acer rather than a false acacia.
At 17 Wordsworth Walk:

- TPO-F1-45 is a magnolia not a flowering cherry.

The TPO group TPO-F144 T5, T6 and T7 consists of three horse-chestnut trees in the Orchard allotment behind Asmuns Hill. T5 and T7 are in particularly poor condition with leaf blotch fungus, bleeding canker (T5), damaged crowns and poor shape due to the removal of branches.

Unwin trees in Area 2

The ‘Unwin trees’ are the most important category of trees in Area 2. Unwin sought to retain as many trees as possible from the field landscape before development and to maintain a harmony between these natural features and the new buildings. These trees have a historical importance, but they also comprise some of the most magnificent trees in the Suburb. The field boundaries are marked on the map.

62 trees were marked on Unwin’s 1913 map, of which 40 survive. 37 of these are oaks. Of the 40, only 10 are protected by TPOs. Individual trees of exceptional quality include the major oak behind 11 Asmuns Hill, the oaks to the rear of 16 and 18 Erskine Hill and the very old oak in the grounds of The Orchard which has a girth of 3.25 metres.

The most complete line of boundary trees runs from Childs Way, starting by the old school caretaker’s cottage, with a run of oaks along the path by the Hampstead Garden Suburb Junior School, and continuing with trees in Asmuns Hill and Erskine Hill rear gardens. The line then runs behind the cottages on the north side of Denman Drive. It is interesting to observe on Map 2 how the diagonal placing of the houses at the junction of Asmuns Hill and Erskine Hill (56 Asmuns Hill and 77 Erskine Hill) accommodated the original trees at the crossing of two field boundaries.

Other Unwin trees are mostly in good condition. As is to be expected, some of the old oaks have lost branches or been damaged by pruning. The best specimens are in the allotments and recreational areas where there is space for them to flourish.

Groups of significant trees in Area 2

There are six groupings of trees making a significant impact in the Artisans’ Quarter. Two areas of modern specimen planting stand out. The first is in the grounds of The Orchard, a sheltered housing development that replaced an original 1909 building. The style of the 1972 building is typical of its time, and without the careful landscaping it would look very stark and out of character with the surrounding cottages. The pedestrian entrances from the NE (Willifield Way) and from the SW are framed by a fine silver birch and a liquidambar respectively. Elsewhere, older trees have been retained to screen the car park from the gardens of houses in Temple Fortune Hill. A group of silver birches adds interest to the central path.

The second area of modern planting is to be found on Willifield Green, which is under the care of the London Borough of Barnet. Over the past twenty years seven trees have been planted, one commemorating the 90th anniversary of Hampstead Garden Suburb Trust. Species include liquidambar, oak, false acacia and Cappadocian acer.

The false acacia trees are a mop-headed variety (Robinia pseudo acacia ‘umbraculifera’) which, when pollarded, produces a small, round-headed tree. These trees echo the original planting of street trees on Willifield Way. Two of the original street trees remain and some recent replacement street trees have also been mop-headed robinia. These trees contribute to the ‘village green’ ambiance without significantly reducing the open space for children to play and for parents to gather to meet children from the nearby junior school.
Another group of significant trees surrounds the bowling green site to the rear of Willifield Way, Asmuns Hill and Erskine Hill. This group is covered by a group TPO; it is densely wooded with 28 major trees and many self-seeded smaller trees. Lime, horse-chestnut and birch predominate. This grouping has a big visual impact in the centre of Area 2 where the roads converge on Willifield Green. The trees can be seen over roofs in Willifield Way, Wordsworth Walk, Coleridge Walk, Erskine Hill and the upper section of Asmuns Hill. A much smaller decorative planting scheme at Queens Court is of historic interest. Flowering cherry trees were originally planted on either side of each entrance. Some of the oldest trees survive and some have been replaced. Currently there are 13 trees of differing quality and maturity. The distribution is documented in the spreadsheet.

The group of 7 limes at the entrance to Wordsworth Walk is something of a mystery. They look like pairs of street trees but they do not appear on the list of Barnet street trees and Barnet does not accept responsibility for them. Research continues (see spreadsheet and map for detail). Finally, the group of two catalpas framing the central door of Erskine House in Homesfield is very attractive. They also act as the focal point in the cul-de-sac. The story that they were gifted and planted by one of Dame Henrietta’s distinguished visitors, an Indian Maharajah (catalpa=Indian bean tree), is charming but probably apocryphal.

**Individual trees of note in Area 2**

The best trees tend to act as a focal point to close a view, to draw the eye along a road or to mark an entrance. Examples of such trees include:

- The lime and the oak marking the junction of Willifield Way and Hogarth Hill
- The oak at the entrance to the twitten by 148 Willifield Way, a large, well-shaped tree which adds drama and emphasises the set back in the building line
- The limes on the green at the head of Asmuns Place which are the focal point of the cul-de-sac and draw attention to the pitch and wide span of the cottage roofs
- The oaks in the gardens of 53 Temple Fortune Hill and 16-18 Erskine Hill which set off the elaborate brick chimneys of the larger houses and steep roofs of the cottages beyond.

Other individual trees of note are found in the allotments. They include:

- The oak in Asmuns Hill Allotments behind 11 Asmuns Hill. This tree is 2-300 years old. In winter there is a tremendous view from Asmuns Place through the tracery to the spire of St Jude’s and the dome of the Free Church.

Thirty-five individual trees were identified as significant. There are a further 16 groups of trees in which each individual tree may not be of striking quality but where, as a group, they make a strong contribution to the streetscape. Apart from the modern planting in Willifield Green and The Orchard, most of these trees are to be found in backlands and rear gardens.

**Tree Preservation Order Recommendations**

Thirteen trees in Area 2 are recommended for consideration for Tree Preservation Orders (see Spreadsheet).

2 1 CHILT08 Childs Way S side of footpath oak high but poor shape, lopped on school side only, 'wound' wood

2 1 CHILT09 Childs Way S side of footpath oak fair shape and height for age, close to neighbouring tree which is affecting growth pattern

2 1 CHILT10 Childs Way N side of path behind 127 W Way oak old oak, roof height, good shape has more space to spread check

2 1 CHILT11p Childs Way S side of path oak group of 6 Norway maples and 1 spirally self-seeded birch forming, with the oaks opposite, a very attractive shaded walk by the school. The trees screen the playground and the playing field.

2 1 CHILT12 Childs Way S of path, on edge of school car park oak a younger oak than the nearby Unwin oaks, roof height, good shape crown, lower branches removed.

2 1 TPO-CA-103 T1 Coleridge Walk Allotment garden land at rear of 20 & 22 oak good oak, probably a field boundary oak, good shape

2 1 TPO-CA-103 T2 Coleridge Walk Allotment garden land at rear of 20 & 22 oak good shape, one of 2 boundary oaks

2 1 CREST01 Creswick Walk 18 front garden by path birch adds height and movement to the streetscape

2 1 DENMT01 Denman Drive rear of 13, NE corner oak mature, good shape, one of a group of trees that can be seen clearly over the can be seen over the garages of 13

2 1 TRE-F1-43 T3 Denman Drive rear boundary of 7 ash visible from rear access path

2 1 TRE-F1-43 T6 Denman Drive rear boundary of 9 oak? believe to be an oak, covered in ivy not maple as listed Exceptionally fine tree TPO QUERY

2 1 TRE-F1-43 T7. Denman Drive rear boundary E of 13 oak? believe this to be an ash not birch as listed a huge tree with trunk dividing into 3 TPO QUERY

2 1 TRE-F1-43 T8 Denman Drive rear Centre of 13 wild service tree? believe this to be a wild service tree rather than a false acacia as listed (very hard to see, cannot really be said to be visible from a public place) TPO QUERY

2 1 ERSKT03 Erskine Hill Rear garden border of 56 and 54 oak visible from path from junction of Woodside and Erskine Hill and over Erskine Hill roofs

2 1 ERSKT04 Erskine Hill Rear of 58 on border with 60 oak? possibly oak, one of a dense group of trees here, visible over roofs

2 1 ERSKT05g Erskine Hill 69 or 717 rear garden birch 2 very tall, graceful trees which can be seen from Asmuns Hill between 54 and 56, through the oaks.

2 1 ERSKT06 Erskine Hill 64, in rear garden willow? high, graceful tree visible from Erskine Hill and Woodside, attractive view across gardens

2 1 ERSKT07 Erskine Hill 77 by garage between 77 and 75 oak characterful tree, lot of work in past on N side but good shape, 1 of 3 trees here on old field boundary

2 1 ERSKT08 Erskine Hill 77 rear garden on border with 56 Asmuns Hill oak substantial past tree work but still a handsome old oak when in leaf

2 1 ERSKT09 Erskine Hill 88 side garden by junction with Holmesfield oak large, healthy tree, frames entrance to Holmesfield

2 1 ERSKT10 Erskine Hill 105 centre of front garden oak Unwin map shows slightly different position by twitten entrance, good shape and height

2 1 ERSKT11 Erskine Hill 109 rear garden oak tree is flourishing; visible from road

2 1 ERSKT12 Erskine Hill 117 rear garden oak tree grown, possibly boundary oak, part of excellent group viewed from Temple Fortune Hill; 2 major oaks, 2 silver birches; exceptionally fine tree

2 1 ERSKT13g Erskine Hill 123 rear garden oak part of fine group viewed from Temple Fortune Hill, 2 major oaks, 2 silver birches; exceptionally fine tree

2 1 ERSKT14 Erskine Hill 125 rear garden oaks large group of 2 oaks, possibly boundary oak, part of excellent group viewed from Temple Fortune Hill; 2 major oaks, 2 silver birches; exceptionally fine tree

2 1 HAMWT01 Hampstead Way behind Gallery sycamore tall, papery bark on smaller, 1 storey gallary, a striking feature of the streetscape rear entrance to the Suburb

2 1 FARM03g Farm Walk on N side of path just by rear of flats sycamore very high, multi-stemmed stemmed tree, marks entrance to Farm Walk, contributes to leafy atmosphere of this path

2 1 FARM03 Farm Walk 3 behind garage sycamore major oak possibly boundary oak . scars above the 3 storey house next to the garage, a fine tree TPO RECOMMENDATION

2 3 FARM04g Farm Walk triangular plot on W side of tennis club land ash, oak hawthorn 3 attractive trees soften entrance to Farm Walk; screen Tennis Club; 2 ash and a contorted old hawthorn with copious spring blossom

2 1 HAMWT01 Hampstead Way behind Gallery sycamore tall, papery bark on smaller, 1 storey gallary, a striking feature of the streetscape rear entrance to the Suburb

2 3 HAMWT01g Hampstead Way 4 gardens behind Arcade House (flats) sycamore a group of 2 poplars and a copper beech, visible both from Hampstead Way and Farm Walk, a very distinctive feature especially from farm Walk

2 2 HAMWT04g Hampstead Way 126 front garden sycamore 2 tall trees, roof height, good shape, on the corner of the junction they emphasise the curve into Temple Fortune Hill. Group. TPO in place

2 1 HOUGHT01 Hogarth Hill End of twitten behind substation oak 1 of 6 trees in a row only visible over roofs or from end of twitten by 182 Willifield Way. Fine, well shaped crown, boundary tree

2 1 HOUGHT02 Hogarth Hill 3 backlands behind oak 1 of 6 trees in a row visible between 3 and 5 Hogarth Hill; over roofs and from end of twitten by 182 W Way. TPO RECOMMENDATION Group TPO nearby

2 1 HOUGHT03 Hogarth Hill 6 rear garden boundary oak 1 of 6 trees in a row visible between 3 and 5 Hogarth Hill over roofs or from end of twitten by 182 W Way

2 1 HOUGHT04 Hogarth Hill 7 rear garden oak double-stemmed beech, 1 of 6 trees in a row visible between 7 and 9 Hogarth Hill and over roofs or from end of twitten by 182 Willifield Way.

2 1 HOUGHT05g Hogarth Hill End of twitten behind substation oak younger oak than nearby trees but a strong, tall, well-shaped tree
2 1 HOGHT06 Hogarth Hill 2 front oak huge well shaped mature oak. Focal point on corner site. TPO RECOMMENDATION

2 1 HOGHT07 Hogarth Hill 10 front garden corner of Wordsworth walk oak boundary oak much cut but reasonable shape, marks entrance to Wordsworth Close. Group TPO nearby

2 1 HOGHT08 Hogarth Hill 52 front garden oak marks the corner with Addison Way, provides an attractive focus to the corner

2 HOLM01g Holmefield 3 & 4 Erskine House to front catalpa frame central door of Erskine House. Replicated by a visiting Maharajah. Originally planted at the same time, now different in size, one appears to have fallen and regenerated. TPO RECOMMENDATION

2 HOLM02 Holmefield 1 Erskine House, to rear and side oak enormous, mature oak in garden, fills the whole corner providing a backdrop to the buildings, felled with consent 2013

2 HAMWT03g Queens Court Queens Court, all entrances flowering cherry entrance to Queens Court. Present as a mixed cherry and beech, with a few rhododendron, currant and juniper. TPO in place, not visible from road.

2 2 TPO-F144 T5 The Orchard allotment to rear of 22 Asmuns Hill horse chestnut tree in poor condition with leaf blotch fungus, possibly bleeding canker, trunk damaged, poor shape

2 1 TPO-F144 T6 The Orchard allotment to rear of 91 Willifield Way horse chestnut good shape, soars above roofs but also with leaf blotch fungus

2 1 TPO-F144 T7 The Orchard allotment to rear of 28 Asmuns Hill oak tree in poor condition with leaf blotch fungus, crown has been lopped off

2 1 TPO-F144 T1 Willifield Way rear of 106 hawthorn not seen from road, only viewable from rear twitten, medium height tree, no particular shape

2 1 TPO-F144 T2 Willifield Way rear of 86 oak crown only visible from rear twitten, appears to be in good condition.

2 1 TPO-F144 T8 Willifield Way on boundary of 95 and 97 oak mature spreading oak, tall height, extensive work on one side, massive branch removed but tree appears to be in good condition, though overall shape is lop sided

2 1 WILWT01 Willifield Way 182, backlands behind oak boundary oak, visible over roofs or from end of twitten by 182

2 1 WILWT02 Willifield Way 180 front lime very high, well shaped tree. Focal point on corner site, can be seen along the length of this part of Willifield Way. TPO RECOMMENDATION

2 1 WILWT03 Willifield Way 179 rear hedge oak very high, well shaped tree. Focal point on corner site, can be seen along the length of this part of Willifield Way. TPO RECOMMENDATION

2 1 WILWT04 Willifield Way 177 rear hedge 16 Erskine H. silver birch 2 elegant silver birches form an attractive group with the nearby oaks, significant element of the streetscape

2 1 ORCHT06 The Orchard N side of path by main entrance silver birch frames entrance to the Orchard from WildField Way, mature tree, good shape, adds movement to landscape

2 1 ORCHT07 The Orchard W side of path to N allotment silver birch group of 4, formerly 5, attractive and well placed birches provide a focal point in the landscape of the inner gardens.

1 1 TPO-F144 T10 The Orchard allotment to rear of 22 Asmuns Hill horse chestnut tree in poor condition with leaf blotch fungus, possibly bleeding canker, trunk damaged, poor shape

1 1 ORCHT04 The Orchard N side of path to allotment silver birch

1 1 ORCHT05g The Orchard rear hedge 17 Temple Fortune Hill hornbeam 3 hornbeams, and one cypress provide screen at back of car park; a group with a significant function

1 1 ORCHT06 The Orchard seen SE corner of car park screen car park, softens landscape

1 1 ORCHT07 The Orchard seen SW corner of car park silver birch

1 1 ORCHT08 The Orchard N side of path by main entrance liquidambar fine tree, (check height) frames entrance to the residential buildings. TPO RECOMMENDATION

1 1 WILWT02 Willifield Way 180 front lime very high, well shaped tree. Focal point on corner site, can be seen along the length of this part of Willifield Way. TPO RECOMMENDATION

1 1 WILGT01g Willifield Green SW corner of the Green black poplar 2 once polarded poplars in centre of group with 2 young and struggling oaks, various shrubs including philadelphus and wild rose. All overgrown but group screen school buildings from the green and greatly softens the landscape. Area TPO in place.

1 1 TPO-F144 T4 The Orchard On boundary to rear of 23 Temple Fortune Hill oak fine tree, good shape and height. 3.25m diameter. Some damage and disease but thriving. Exceptionally fine tree

1 1 TPO-F144 T5 The Orchard allotment to rear of 22 Asmuns Hill horse chestnut tree in poor condition with leaf blight fungus, possibly bleeding canker, trunk damaged, poor shape

1 1 TPO-F144 T6 The Orchard allotment to rear of 91 WildField Way horse chestnut good shape, soars above roofs but also with leaf blight fungus

1 1 TPO-F144 T7 The Orchard allotment to rear of 28 Asmuns Hill horse chestnut tree in poor condition with leaf blight fungus, crown has been lopped off

1 1 WILGT03 Willifield Green SW corner of the Green juniper, almond small but attractive tree, planted very close to shop group, paved surround. Area TPO in place.

1 1 WILGT04 Willifield Green NW section of Green towards centre horse chestnut small, young tree, good shape, vigorous growth. Area TPO in place.

1 1 WILGT05 Willifield Green NW corner of the Green, on boundary Acer Capuccinum small attractive tree, good shape and condition. Area TPO in place.

1 1 TPO-F144 T1 Willifield Way rear of 106 hawthorn not seen from road, only viewable from rear twitten, medium height tree, no particular shape

1 1 WILGT07 Willifield Green SE corner of the Green in centre maple planted in memory of T. Mandelson, paved surround with bench pretty shape and good condition. Forms an attractive group with WILGT06 and 07. Area TPO in place.

1 1 WILGT08 Willifield Green SE corner of the Green near boundary false acacia small, young, trip-nodulated robinia, historic marker - echoes the robinias which were the original street trees in Willifield Way. Area TPO in place.

1 1 TPO-F144 T1 TPO-Ca-106 T1 WildField Way 180 front garden sycamore good condition, tree extends over pavement, complements the curved terrace of houses at SE Corner of Orchard Circus. Exceptionally fine tree
