

Tree Survey

Hampstead Garden Suburb

ARTISANS' QUARTER – AREA 2

Date of observations: June 2012

This report has three elements.

1. A brief overview account of the trees in the area.
2. An area map showing;
 - the location of TPO trees,
 - trees shown on Unwin's 1913 map and,
 - other trees which make a significant contribution to the local streetscape.
3. A spreadsheet providing full details of the observations.

Area 2 Overview

Date of Observations October 2012 – May 2013

Introduction

The Artisans' Quarter is the oldest part of Hampstead Garden Suburb. It is an area in which the oak trees originating in the pre-existing field hedges are an important feature of the landscape. These boundary oaks and other significant trees are mainly found in the generous backland allotments and recreational areas. Much of the picturesque character of the area derives from the juxtaposition of the huge old trees soaring above the steeply pitched roofs of the cottage groups. There is also some specimen planting in public areas and many mature trees in rear gardens.

Street trees are not part of this Survey, but it is worth noting how many streets are lined with large trees (e.g. lime, London plane) rather than smaller ornamental trees. This adds further depth to the contribution that trees make to the lush green ambience of this village-like area.

However, as elsewhere in the Suburb, there is a lot of overcrowding from self-seeded trees. This reduces the impact that mature trees can make in the landscape. Some species are so rapid in their growth that they are unsuitable for front gardens, masking the architecture, blocking light and potentially, if too near the house, causing damage.

Species in Area 2

Oak (56) is the most numerous species followed by acer (including field and Norway maple, sycamore and Cappadocian acer), lime and birch. Outside these concentrations, the individual trees are from a range of species which are commonly found in Southeast England: ash, horse-chestnut, beech and copper beech, box elder, willow and yew.

TPO Trees in Area 2

28 TPO trees are shown on Barnet's map of this section of the conservation area. With the addition of a TPO made in March 2014 on an oak at 12 Asmunds Hill, this figure is now 29.

Most of these can easily be seen from the road or public footpaths although the group of TPOs in Denman Drive can only be seen over the rooftops from the road.

15 of the 29 TPO trees are mature oaks. 8 are trees of exceptional quality, in good condition and having great height and good shape. These are noted in the spreadsheet. The oak in the corner of Big Allotment that can be seen down the twittens leading from both Wordsworth and Coleridge Walks is quite exceptional in its age, condition and beauty. It is certainly one of the two or three finest trees in the whole Suburb. The remainder of the TPO trees flourish but have sometimes been subject to the removal of branches without regard to the overall shape of the tree.

There are 4 TPO queries in this area. 4 TPO trees were found to be of a different species from that shown on the Barnet map and listing.

In Denman Drive where it is difficult to view the trees at close quarters, the TRE-F1-43 group did not appear to correspond to the listing:

- T5 is an oak, not an ash, and it is in the rear boundary of 7 Denman Drive rather than in the rear garden of 12 Woodside as shown on Barnet map
- T6 is an oak not an ash
- T8 appears to be an acer rather than a false acacia.

At 17 Wordsworth Walk:

- TPO-F1-45 is a magnolia not a flowering cherry.

The TPO group TPO-F144 T5, T6 and T7 consists of three horse-chestnut trees in the Orchard allotment behind Asmunds Hill. T5 and T7 are in particularly poor condition with leaf blotch fungus, bleeding canker (T5), damaged crowns and poor shape due to the removal of branches.

Unwin trees in Area 2

The 'Unwin trees' are the most important category of trees in Area 2. Unwin sought to retain as many trees as possible from the field landscape before development and to maintain a harmony between these natural features and the new buildings. These trees have a historical importance, but they also comprise some of the most magnificent trees in the Suburb. The field boundaries are marked on the map.

62 trees were marked on Unwin's 1913 map, of which 40 survive. 37 of these are oaks. Of the 40, only 10 are protected by TPOs. Individual trees of exceptional quality include the major oak behind 11 Asmunds Hill, the oaks to the rear of 16 and 18 Erskine Hill and the very old oak in the grounds of The Orchard which has a girth of 3.25 metres.

The most complete line of boundary trees runs from Childs Way, starting by the old school caretaker's cottage, with a run of oaks along the path by the Hampstead Garden Suburb Junior School, and continuing with trees in Asmunds Hill and Erskine Hill rear gardens. The line then runs behind the cottages on the north side of Denman Drive. It is interesting to observe on Map 2 how the diagonal placing of the houses at the junction of Asmunds Hill and Erskine Hill (56 Asmunds Hill and 77 Erskine Hill) accommodated the original trees at the crossing of two field boundaries.

Other Unwin trees are mostly in good condition. As is to be expected, some of the old oaks have lost branches or been damaged by pruning. The best specimens are in the allotments and recreational areas where there is space for them to flourish.

Groups of significant trees in Area 2

There are six groupings of trees making a significant impact in the Artisans' Quarter. Two areas of modern specimen planting stand out. The first is in the grounds of The Orchard, a sheltered housing development that replaced an original 1909 building. The style of the 1972 building is typical of its time, and without the careful landscaping it would look very stark and out of character with the surrounding cottages. The pedestrian entrances from the NE (Willifield Way) and from the SW are framed by a fine silver birch and a liquidambar respectively. Elsewhere, older trees have been retained to screen the car park from the gardens of houses in Temple Fortune Hill. A group of silver birches adds interest to the central path.

The second area of modern planting is to be found on Willifield Green, which is under the care of the London Borough of Barnet. Over the past twenty years seven trees have been planted, one commemorating the 90th anniversary of Hampstead Garden Suburb Trust. Species include liquidambar, oak, false acacia and Cappadocian acer.

The false acacia trees are a mop-headed variety (*Robinia pseudo acacia* 'umbraculifera') which, when pollarded, produces a small, round-headed tree. These trees echo the original planting of street trees on Willifield Way. Two of the original street trees remain and some recent replacement street trees have also been mop-headed robinia. These trees contribute to the 'village green' ambiance without significantly reducing the open space for children to play and for parents to gather to meet children from the nearby junior school.

Another group of significant trees surrounds the bowling green site to the rear of Willifield Way, Asmunds Hill and Erskine Hill. This group is covered by a group TPO; it is densely wooded with 28 major trees and many self-seeded smaller trees. Lime, horse-chestnut and birch predominate. This grouping has a big visual impact in the centre of Area 2 where the roads converge on Willifield Green. The trees can be seen over roofs in Willifield Way, Wordsworth Walk, Coleridge Walk, Erskine Hill and the upper section of Asmunds Hill. A much smaller decorative planting scheme at Queens Court is of historic interest. Flowering cherry trees were originally planted on either side of each entrance. Some of the oldest trees survive and some have been replaced. Currently there are 13 trees of differing quality and maturity. The distribution is documented in the spreadsheet.

The group of 7 limes at the entrance to Wordsworth Walk is something of a mystery. They look like pairs of street trees but they do not appear on the list of Barnet street trees and Barnet does not accept responsibility for them. Research continues (see spreadsheet and map for detail). Finally, the group of two catalpas framing the central door of Erskine House in Homesfield is very attractive. They also act as the focal point in the cul-de-sac. The story that they were gifted and planted by one of Dame Henrietta's distinguished visitors, an Indian Maharajah (catalpa=Indian bean tree), is charming but probably apocryphal.

Individual trees of note in Area 2

The best trees tend to act as a focal point to close a view, to draw the eye along a road or to mark an entrance. Examples of such trees include:

- The lime and the oak marking the junction of Willifield Way and Hogarth Hill
- The oak at the entrance to the twitten by 148 Willifield Way, a large, well-shaped tree which adds drama and emphasises the set back in the building line
- The limes on the green at the head of Asmunds Place which are the focal point of the cul-de-sac and draw attention to the pitch and wide span of the cottage roofs
- The oaks in the gardens of 53 Temple Fortune Hill and 16-18 Erskine Hill which set off the elaborate brick chimneys of the larger houses and steep roofs of the cottages beyond.

Other individual trees of note are found in the allotments. They include:

- The oak in Asmunds Hill Allotments behind 11 Asmunds Hill. This tree is 2-300 years old. In winter there is a tremendous view from Asmunds Place through the tracery to the spire of St Jude's and the dome of the Free Church.

Thirty-five individual trees were identified as significant. There are a further 16 groups of trees in which each individual tree may not be of striking quality but where, as a group, they make a strong contribution to the streetscape. Apart from the modern planting in Willifield Green and The Orchard, most of these trees are to be found in backlands and rear gardens.

Tree Preservation Order Recommendations

Thirteen trees in Area 2 are recommended for consideration for Tree Preservation Orders (see Spreadsheet).

NOT TO SCALE

Area	TPO	Unwin trees	Signifi cant Trees	TPO Ref no/SIG Ref no.	TPO Tree No.	Street	Location	Species	Notes
2			1	ADDIT01		Addison Way	24, side garden by Creswick Walk	oak	fine mature oak frames entrance to Creswick Walk
2			1	ADDIT02		Addison Way	24, side garden by Creswick Walk	beech	good shape, mature multi-stemmed beech
2			4	ADDIT03g		Addison Way	46, front garden, corner with Coleridge Walk	sycamore, poplar, ashk & lime	4 large trees balance the TPO in garden of 48 to frame entrance to Coleridge Walk and provide a country aspect to a busy road. NB the TPO is listed under Coleridge Walk. Group TPO in place nearby
2			4	ADDIT04g		Addison Way	60, front garden, corner with Erskine Hill	maple, cherry and sycamore	a group of large trees marks entrance to Erskine Hill, provides a country aspect to a busy road (Addison way)
2	1			TPO-F1-45	T1	Addison Way	NW corner of garden 48 Addison Way	ash	fine specimen in height and shape
2				ASMHT01		Asmunds Hill	1, rear garden	oak	smaller oak on field boundary line; well-shaped crown; felled 2013 with permission
2			1	ASMHT02		Asmunds Hill	11, on boundary with allotment	oak	enormous, well-tended ancient oak, one of the best in the Suburb; good shape and condition; TPO RECOMMENDATION
2			1	ASMHT03		Asmunds Hill	24 front garden	false acacia	shapely young tree, adds colour and movement, highlights set back in building line
2			1	ASMHT04		Asmunds Hill	25 garden, gap between 25 and 27	cedar	striking evergreen, prominent feature in street Check species
2		1		ASMHT06		Asmunds Hill	35, front garden, bdry. with 37	oak	good shape, good crown, tall, mature oak. TPO RECOMMENDATION
2			1	ASMHT07		Asmunds Hill	56 NW of rear garden by garage	oak	Not on Unwin map, but tree is in the hedge line. Old tree much doctored, but good crown in summer
2		1		ASMHT08		Asmunds Hill	56 centre of rear garden	oak	tall, boundary oak, much cut but in a good state
2	1	1		TPO-CA-139	T1	Asmunds Hill	9 allotment to rear of	oak	major oak, one of the oldest and finest specimens in the Suburb; update Nov 2013: extensive tree surgery due to major branch fall in the summer; the crown is cut back to the large branches
2	1			TPO-CA-139	T2	Asmunds Hill	allotment land at rear in boundary of 3	Scots pine	tall; reasonable shape
2		1		ASMPT01		Asmunds Place	4 front garden	oak	1 of 2 ancient oaks, the larger one in the street, not a great shape but healthy given age
2			1	ASMPT02		Asmunds Place	45 rear garden	oak	excellent, huge tree, towering over the roofs of cottages at the end of the cul-de-sac. Visible from Hampstead Way and Finchley Road; TPO RECOMMENDATION
2			1	ASMPT03		Asmunds Place	E section of green	lime	very tall, well shaped lime. Together with a second lime this is a focal point in this cul-de sac, TPO RECOMMENDATION
2			1	ASMPT04		Asmunds Place	E section of green	lime	very tall, well-shaped lime. Together with a second lime this is a focal point in this cul-de sac, TPO RECOMMENDATION
2			20	BOWLTO1g		Bowling Green Site	Adjacent to the north-east and north-west boundaries of the site	lime, h.chestnut, ash, maple, beech, birch	densely wooded strip of land borders the tennis courts, bowling green and allotments, providing a barrier between these recreational areas and domestic gardens. Exceptionally tall lime, horse chestnut and birch trees. Some maple, birch and 2 laburnums. The crowns of the forest species are visible over roofs in all the surrounding streets, especially from Willifield Green, Wordsworth Walk and the upper part of Asmunds Hill. They make a notable contribution to the streetscape. Apart from the H. chestnut trees, the trees are in good condition although their shapes reflect the crowded location. Approx. 20 trees in total, plus numerous saplings. Group TPO
2			10	BOWLTO2g		Bowling Green Site	Adjacent to the south-east boundary of the site	lime, h.chestnut, ash, maple, beech, birch	densely wooded strip of land borders the tennis courts, bowling green and allotments, providing a barrier between these recreational areas and domestic gardens. Exceptionally tall lime, horse chestnut and birch trees. Some maple, birch and 2 laburnums. The crowns of the forest species are visible over roofs in all the surrounding streets, especially from Willifield Green, Wordsworth Walk and the upper part of Asmunds Hill. They make a notable contribution to the streetscape. Apart from the H. chestnut trees, the trees are in good condition although their shapes reflect the crowded location. Approx. 10 trees in total, plus numerous saplings. Group TPO
2	1			TPO-F1-45	T2	Bowling Green Site	rear of 136 in grounds of Fellowship House	oak	one of a line of trees including maples and birch? visible over roofs from Willifield Green, Asmunds Hill and the twitten between 37 Asmunds Hill and 132 Willifield way. A major 'backcloth' run of trees. (see Bowling Green) Exceptionally fine tree
2	1	1		TPO-F1-45	T3	Bowling Green Site	Bowling Green	birch	one of a line of trees including maples and ash dividing bowling green from allotments. (see entry on this site as a whole)
2			5	CHATT01g		Chatham Close	Allotment land to rear of 9 and 7, E bdry.	sycamore, ash, oak	5 substantial trees on rear E boundary just before the land falls away. Attractive enclosing feature of the allotment, 3 sycamores, an ash and an oak
2			4	CHATT02g		Chatham Close	Allotment, boundary with 30-38 Erskine Hill	ash, willow, horse chestnut, maple	4 substantial trees form attractive w boundary to allotment, willow and oak visible over garages between 30 and 32
2		1		CHILT01		Childs Way	NW Corner of garden, caretakers house	oak	high, handsome tree, good shape, towers over house and pathway. Some neglect in crown, crowded badly by overgrown shrub, but overall healthy.
2		1		CHILT02		Childs Way	E side of school gate	oak	reasonable shape, medium height. Broken stub in centre, needs TLC, tarmac surround
2		1		CHILT03		Childs Way	S. side of footpath in school playground	hornbeam	good shape and height; not clear if this is a replacement for an oak or an original hedge tree; tarmac surround
2		1		CHILT04		Childs Way	S. side of footpath	oak	medium height, some crude surgery, ? Health, shedding bark but branch extends attractively over the path
2		1		CHILT05		Childs Way	S. side of footpath W of small school gate	oak	reasonable shape, medium height,
2		1		CHILT06		Childs Way	S. side of footpath	oak	reasonable shape, medium height thinner crown
2		1		CHILT07		Childs Way	S. side of footpath	oak	huge trunk, broad open crown, roof height, a better, older tree than others in the group, some pruning and damage on N side of trunk but overall a magnificent tree. TPO RECOMMENDATION

2		1		CHILT08		Childs Way	S. side of footpath	oak	high but poor shape, lopped on school side only, 'wound' wood
2		1		CHILT09		Childs Way	S side of footpath	oak	fair shape and height for age, close to neighbouring tree which is affecting growth pattern
2		1		CHILT10		Childs Way	N side of path behind 127 W Way	oak	old oak, roof height, good shape has more space to spread check
2			6	CHILT11g		Childs Way	N side of path	Norway maple	group of 5 Norway maples and 1 spindly self-seeded birch forming, with the oaks opposite, a very attractive shaded walk by the school. The trees screen the playground and the playing field.
2			1	CHILT12		Childs Way	S of path, on edge of school car park	oak	a younger oak than the nearby Unwin oaks, roof height, good shape high crown, lower branches removed.
2	1			TPO-CA-103	T1	Coleridge Walk	Allotment garden land at rear of 20 & 22	oak	good oak, probably a field boundary oak, good shape
2	1	1		TPO-CA-103	T2	Coleridge Walk	Allotment garden land at rear of 20 & 22	oak	good shape, one of 2 boundary oaks
2			1	CREST01		Creswick Walk	18 front garden by path	birch	adds height and movement to the streetscape
2		1		DENMT01		Denman Drive	rear of 13, NE corner	oak	mature, good shape, one of a group of trees that can be seen clearly over the can be seen over the garages of 13
2	1	1		TRE-F1-43	T5	Denman Drive	rear boundary of 7	ash	visible from rear access path
2	1			TRE-F1-43	T6	Denman Drive	rear boundary of 9	oak ?	believe to be an oak, covered in ivy not maple as listed Exceptionally fine tree TPO QUERY
2	1			TRE-F1-43	T7	Denman Drive	rear boundary E of 13	ash?	believe this to be an ash not birch as listed a huge tree with trunk dividing into 3 TPO QUERY
2	1			TRE-F1-43	T8	Denman Drive	rear Centre of 13	wild service tree?	believe this to be a wild service tree rather than a false acacia as listed (very hard to see, cannot really be said to be visible from a public place-) TPO QUERY
2		1		ERSKT03		Erskine Hill	Rear garden border of 56 and 54	oak	visible from path from junction of Woodside and Erskine Hill and over Erskine Hill roofs
2		1		ERSKT04		Erskine Hill	Rear of 58 on border with 60	oak?	possibly oak, one of a dense group of trees here, visible over roofs
2			2	ERSKT05g		Erskine Hill	69 or 71? rear garden	birch	2 very tall, graceful trees which can be seen from Asmunds Hill between 54 and 56, through the oaks.
2			1	ERSKT06		Erskine Hill	64, in rear garden	willow?	high, graceful tree visible from Erskine Hill and Woodside, attractive view across gardens
2		1		ERSKT07		Erskine Hill	77 by garage between 77 and 75	oak	characterful tree, lot of work in past on N side but good shape, 1 of 3 trees here on old field boundary
2		1		ERSKT08		Erskine Hill	77 rear garden on border with 56 Asmunds Hill	oak	substantial past tree work but still a handsome old oak when in leaf
2			1	ERSKT09		Erskine Hill	86 side garden by junction with Holmesfield	oak	large, healthy tree, frames entrance to Holmesfield
2		1		ERSKT10		Erskine Hill	105 centre of front garden	oak	Unwin map shows slightly different position by twitten entrance, good shape and height
2		1		ERSKT11		Erskine Hill	109 rear garden	oak	tree is flourishing; visible from road
2	1	1		TRE-F1-43	T3	Erskine Hill	In rear garden of 16	oak	good shape and size, boundary oak part of excellent group viewed from Temple Fortune Hill; 2 major oaks, 2 silver birches; exceptionally fine tree
2	1	1		TRE-F1-43	T4	Erskine Hill	In rear garden of 18	oak	magnificent boundary oak, good shape, size and condition for age, part of excellent group viewed from Temple Fortune Hill; exceptionally fine tree
2			1	FARMT01		Farm Walk	1 rear garden hard against boundary	oak	tree has been cut but appears in reasonable condition
2			1	FARMT02		Farm Walk	On N side of path just by rear of flats	sycamore	very high, multi-stemmed stemmed tree, marks entrance to Farm Walk, contributes to leafy atmosphere of this path
2			1	FARMT03		Farm Walk	3 behind garage	oak	major oak possibly boundary oak , soars above the 3 storey house next to the garage, a fine crown. TPO RECOMMENDATION
2			3	FARMT04g		Farm Walk	triangular plot on w side of tennis club land	ash, oak hawthorn	3 attractive trees soften entrance to Farm Walk, screen Tennis Club, 2 ash and a contorted old hawthorn with copious spring blossom
2			1	HAMWT01		Hampstead Way	behind Gallery	poplar	tall poplar rises over the small, 1 storey gallery, a striking feature of the streetscape near entrance to the Suburb
2			3	HAMWT02g		Hampstead Way	in gardens behind Arcade House (flats)	poplar, copper beech	a group of 2 poplars and a copper beech, visible both from Hampstead Way and Farm Walk, a very distinctive feature especially from farm Walk
2			2	HAMWT04g		Hampstead Way	126 front garden	sycamore	2 tall trees, roof height, good shape, on the corner of the junction they emphasise the curve into Temple Fortune Hill. Group. TPO in place
2		1		HOGHT01		Hogarth Hill	End of twitten behind substation	oak	1 of 6 trees in a row only visible over roofs or from end of twitten by 182 Willifield Way. Fine, well shaped crown, boundary tree
2		1		HOGHT02		Hogarth Hill	3 backlands behind	oak	1 of 6 trees in a row visible between 3 and 5 Hogarth Hill , over roofs and from end of twitten by 182 W Way. TPO RECOMMENDATION Group TPO nearby
2			1	HOGHT03		Hogarth Hill	5 rear garden boundary	beech	1 of 6 trees in a row visible between 3 and 5 Hogarth Hill over roofs or from end of twitten by 182 W Way
2			1	HOGHT04		Hogarth Hill	7 rear garden	beech	double-stemmed beech, 1 of 6 trees in a row visible between 7 and 9 Hogarth Hill and over roofs or from end of twitten by 182 Willifield Way
2			1	HOGHT05		Hogarth Hill	End of twitten behind substation	oak	younger oak than nearby trees but a strong, tall, well-shaped tree

2			1	HOGHT06		Hogarth Hill	2 front	oak	huge well shaped mature oak, Focal point on corner site. TPO RECOMMENDATION
2		1		HOGHT07		Hogarth Hill	10 front garden corner of Wordsworth walk	oak	boundary oak much cut but reasonable shape, marks entrance to Wordsworth Close. Group TPO nearby
2			1	HOGHT08		Hogarth Hill	32 front garden	lime	marks the corner with Addison Way, provides an attractive focus to the corner
2			2	HOLM01g		Holmesfield	3 & 4 Erskine House to front	catalpa	frame central door of Erskine House. Reputedly given by a visiting Maharajah. Originally planted at the same time, now different in size, one appears to have fallen and regenerated. TPO RECOMMENDATION
2				HOLM02		Holmesfield	1 Erskine House, to rear and side	oak	enormous, mature oak in garden, fills the whole corner providing a backcloth to the buildings; felled with consent 2013
2			13	HAMWT03g		Queens Court	Queens Court, all entrances	flowering cherry	planting scheme of historic interest . Originally 2 trees were planted either side of the paths to the various flat entrances. Current situation- entrances 1-4,5-8 trees missing,9-12 2 replacement saplings,13-16 1 remaining, 18-21 2 very old trees, 22-25 2 replacement saplings, 26-29 1 mature tree, 31-34, 35-38, 2 mature trees, 30-40 1 very old tree.
2			2	TEFHT01g		Temple Fortune Hill	53 E garden near b'dary with 16 Erskine H.	silver birch	2 elegant silver birches form an attractive group with the nearby oaks, significant element of the streetscape
2		1		TEFHT02		Temple Fortune Hill	E side of 61 near boundary with Bigwood	oak	set in slightly from main run of oaks in Bigwood, a smaller specimen on old field line, good shape
2		3		TEFHT03g		Temple Fortune Hill	52 rear garden boundary with Bigwood	oak	crowns of these trees can be seen over the roof of 52, not clear whether or not the trees are in the garden or have been absorbed into Bigwood.
2	1	1		CA/422	Tx	The Orchard	rear of 12 Asmunds Hill on border with Orchard	oak	Tall, shapely tree, visible through gap between houses on Asmunds Hill, old boundary oak, winter views of church dome through winter tracery, gnarled trunk, wound wood. TPO made March 2014
2				ORCHT01		The Orchard	to rear in Orchard grounds between 8 and 10 Asmunds Hill	willow tortuosa	visible in gap between Asmunds Hill houses, and from the entrance to the Orchard, very tall, good shape, major feature of orchard gardens; felled following storm damage, Nov. 2013
2				ORCHT03		The Orchard	W side of path to N allotment	apple	very old apple tree, possible seedling from original orchard- historic marker Felled with consent due to disease in 2013
2			1	ORCHT04		The Orchard	W side of path to N allotment	silver birch	frames entrance to The Orchard from Willifield Way, mature tree, good shape, adds movement to landscape
2			4	ORCHT05g		The Orchard	rear hedge 17 Temple Fortune Hill	hornbeam	3 hornbeams, and one cypress provide screen at back of car park; a group with a significant function
2			1	ORCHT06		The Orchard	lawn SE corner of car park	pear	screens car park, softens landscape
2			1	ORCHT07		The Orchard	lawn SW corner of car park	silver birch	screens car park, softens landscape, adds movement
2			1	ORCHT08		The Orchard	N side of path by main entrance	liquidambar	fine tree, (check height) frames entrance to the residential buildings TPO RECOMMENDATION
2			4	ORCHT09g		The Orchard	N side of path, centre of buildings	silver birch	group of 4, formerly 5, attractive and well placed birches provide a focal point in the landscape of the inner gardens.
2	1	1		TPO-F144	T4	The Orchard	On boundary to rear of 23 Temple Fortune Hill	oak	fine old tree, good shape and height, 3.25m diameter. Some damage and disease but thriving. Exceptionally fine tree
2	1			TPO-F144	T5	The Orchard	allotment to rear of 22 Asmunds Hill	horse chestnut	tree in poor condition with leaf blotch fungus, possibly bleeding canker, trunk damaged, poor shape
2	1			TPO-F144	T6	The Orchard	allotment to rear of 91 Willifield Way	horse chestnut	good shape, soars above roofs but also with leaf blotch fungus
2	1			TPO-F144	T7	The Orchard	allotment to rear of 28 Asmunds Hill	horse chestnut	tree in poor condition with leaf blotch fungus, crown has been lopped off
2			4	WILGT01g		Willifield Green	SW corner of the Green	black poplar	2 once pollarded poplars in centre of group with 2 young and struggling oaks, various shrubs including philadelphus and wild rose. All overgrown but group screens school buildings from the green and greatly softens the landscape. Area TPO in place.
2			1	WILGT02		Willifield Green	near centre on W boundary opp. Childs Way	field maple	small but attractive tree, very healthy growth. Area TPO in place.
2			1	WILGT03		Willifield Green	SW corner of the Green	prunus, almond	small but attractive tree, planted very close to shrub group, paved surround. Area TPO in place.
2			1	WILGT04		Willifield Green	NW section of Green towards centre	horse chestnut	small, young tree, good shape, vigorous growth. Area TPO in place.
2			1	WILGT05		Willifield Green	NW corner of the Green, on boundary	Acer Cappadocicum	small attractive tree, good shape and condition. Area TPO in place.
2			1	WILGT06		Willifield Green	SE corner of the Green in centre	liquidambar	good shape and condition, planted to commemorate 90th anniversary of the Trust in 1998. Area TPO in place.
2			1	WILGT07		Willifield Green	SE corner of the Green in centre	maple	planted in memory of G. Mandelson, paved surround with bench pretty shape and good condition. Forms an attractive group with WILGT06 and 07. Area TPO in place.
2			1	WILGT08		Willifield Green	SE corner of the Green near boundary	false acacia	small, young, mop-headed robinia, 'historic' marker - echoes the robinias which were the original street trees in Willifield Way. Area TPO in place.
2	1			TPO-CA-106	T1	Willifield Way	49 front garden	box elder	good condition, tree extends over pavement, complements the curved terrace of houses at SE Corner of Crickmer Circus. Exceptionally fine tree
2	1			TPO-F144	T1	Willifield Way	rear of 106	hawthorn	not seen from road, only viewable from rear twitten, medium height tree, no particular shape
2	1			TPO-F144	T2	Willifield Way	rear of 86	oak	crown only visible from rear twitten, appears to be in good condition.
2	1			TPO-F144	T8	Willifield Way	on boundary of 95 and 97	oak	mature spreading oak, roof height, extensive work on one side, massive branch removed but tree appears to be in good condition, though overall shape is lop sided
2		1		WILWT01		Willifield Way	182, backlands behind	oak	boundary oak; visible over roofs or from end of twitten by 182
2			1	WILWT02		Willifield Way	180 front	lime	very high, well shaped tree. Focal point on corner site, can be seen along the length of this part of Willifield Way, TPO RECOMMENDATION

2			1	WILWT03	Willifield Way	148 front garden in hedge by twitten	oak	an excellent boundary oak, dominates the streetscape in that section of Willifield Way, TPO RECOMMENDATION
2		1		WILWT04	Willifield Way	118 rear garden, close boundary with 116	oak	fine tree, visible between houses, boundary oak
2		1		WILWT05	Willifield Way	91 rear garden	oak	good shaped tree, boundary oak visible between 91 and 89
2	1			TRE-F1-43	T9 Woodside	rear of 6	oak	not visible from Woodside, possibly visible from Littlewood but not certain that this tree survives TPO QUERY
2	1	1		TPO-F1-45	T4 Wordsworth Walk	20 front garden	birch	very tall, fine birch, pendulous variety (not in 18 as in TPO record)
2	1			TPO-F1-45	T5 Wordsworth Walk	18 front garden by path shared with 16	oak	old oak, much reduced, lower branches removed , much wound wood (not in garden of 16 as on TPO record)
2	1			TPO-F1-45	T6 Wordsworth Walk	17 front garden	magnolia	tree is a magnolia not a flowering cherry as in TPO record
2	1			TPO-F1-45	T7 Wordsworth Walk	in corner of allotment to N S by twitten to rear of 27	oak	huge healthy oak, magnificent shape. One of the most impressive oaks in the Suburb viewable along twitten in either direction, Exceptionally fine tree
2	1			TPO-F1-45	T8 Wordsworth Walk	12 front garden	birch	indistinct shape, entangled with oak in garden of No. 10
2	1			TPO-F1-45	T9 Wordsworth Walk	10	oak	roof height, lower branches removed over road
2		1		WORDT01	Wordsworth Walk	1 side garden hedge towards rear of house	oak	boundary oak much cut but reasonable shape
2			7	WORDT02g	Wordsworth Walk	near hedges on both sides of the entrance to Wordsworth walk	lime	7 limes, 4 pollarded on the W side of the road and 3 unpollarded trees on the E. Planted in pairs, one missing. These trees are in the street but are not on the Barnet list and Barnet do not accept responsibility for them. (Research continues)
